

5.0 GEOTECHNICAL

A Soils Engineering Investigation for a proposed All Saints Church Sunday School and Day Care Center was prepared and a report issued on 18 September 1990 by Kovacs-Byer and Associates, Inc. This report is included in Section 8.3 of the Appendix for reference.

As the project moves into the design phases, All Saints Church will engage a Geotechnical Consultant to prepare a new report that encompasses the entire project site, and addresses all of the current data required to prepare a structural design for the new facility.
